

## Collected COVID-19 Content and Resources – Updated March 15, 2021

Innovators in the industrial and antimicrobial/biocidal chemical community will play a substantial and possibly game-changing role in the worldwide campaign to confront, contain, and mitigate collateral effects of COVID-19. The pandemic is disrupting chemical stakeholder operations and supply chains in every industrial sector, impacting government regulatory agency functions, and reshuffling priorities. Bergeson & Campbell, P.C. (B&C<sup>®</sup>) regularly monitors key federal and international chemical legislative and regulatory initiatives to keep firm clients and friends informed to assist them in anticipating, understanding, and planning for the challenges and opportunities presented. This document contains a comprehensive listing of our content related to the coronavirus crisis that we hope will be helpful.
